### DETAILED ACTION

Receipt is acknowledged of the response and amendment filed 10/06/04, and the supplemental response filed 10/13/2004.

The rejection under 35 USC 102(e) and 35 USC 103(a) over WO'178 are hereby withdrawn.

The following rejection is maintained in this action:

#### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 85-92, 94-102, 105-113, 116, 119-136, and 138 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-35, 44-77 of copending Application No. 10/443,361 ('361). Although the conflicting claims are not identical, they are not patentably distinct from

each other because '361 claims a method of intradermal administration which like subcutaneous administration reaches the systemic circulation, but at a higher and faster rate (higher bioavailability). Those of ordinary skill in the art would have found it well within their skill to claim the instant method of delivering drugs intradermally given the claims of '361. There are no unusual and/or unexpected results which would rebut prima facie obviousness. The instant method of administration and method of delivery would have been obvious given the claims of '361.

### ***Response to Arguments***

Applicant's arguments filed 10/06/2004 have been fully considered but they are not persuasive.

Applicant argues that the rejection is premature since the copending application has not yet been allowed. However, this provisional rejection is made in view of overlapping subject matter. As such, the rejection is maintained in this action.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
